1. *Pharmaceutical industry* – The pharmaceutical industry is the largest of the three industries, with sales of \$10.5 billion in 1997. It is the only industry that has not experienced a decline in sales since 1990. The industry is dominated by a few large firms, with the top five firms accounting for 40% of sales. The industry is characterized by high R&D expenditures, which are a key source of competitive advantage.

1. The first of these is the fact that the "new" literature is not a new literature at all, but a literature that has been around for a long time. It is a literature that has been around for a long time, and it is a literature that has been around for a long time.
